Mr. Steve Hoke  
Product Safety Engineering, Inc.  
12955 Bellamy Brothers Blvd.  
Dade City, FL 33525

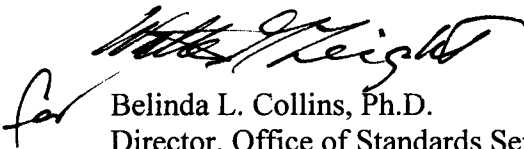

Dear Mr. Hoke:

I am pleased to inform you that your organization has been confirmed by Industry Canada and is now designated to act as a CAB to test equipment under Appendix B, Phase I of the APEC MRA. This designation covers equipment testing subject to the conditions specified for telecommunication equipment in the Canadian Standard CS-03. The names of all approved laboratories will be posted on the NIST website at <http://ts.nist.gov/mra> under the "Asia" category.

Industry Canada will accept test data produced by your organization to verify that the equipment to be imported into Canada satisfies their applicable requirements. Your CAB identification number is **US0124**. You must apply this number to all test reports sent to Industry Canada. Your CAB designation will remain in force as long as your NVLAP and/or A2LA accreditation remains valid for the CS-03 standard.

If you have any questions, please contact Robert Gladhill at 301-975-4273 or Joe Dhillon at 301-975-5521. We appreciate your continued interest in our international conformity assessment activities.

Sincerely,

  
Belinda L. Collins, Ph.D.  
Director, Office of Standards Services
